## Electronic Storage Locker

An electronic storage terminal device is based on IoT technology to provide users with safe and convenient item storage services. Through an intelligent management system and diverse access methods, it enables fast item storage and retrieval, as well as efficient management.

### Business Challenges

#### Poor User Experience

1. Low queue efficiency
2. Easy loss of credentials

#### Difficult Item Management

1. Items are hard to organize and retrieve
2. Disputes arise due to losses

#### High Operating Costs

1. Requires personnel and space
2. Requires material investments

### Solution

Zhilai's Electronic storage locker utilizes secure and efficient identity recognition technology to achieve intelligent and secure management of the entire process from item storage to retrieval. It not only provides users with a convenient storage experience but also improves operators' service satisfaction while reducing management costs.
