

Intelligent Police Equipment Storage Locker

This is a high-security intelligent storage terminal device based on RFID (Radio Frequency Identification) technology, specifically designed for the safe storage of police equipment. It enables precise identification and management of police equipment, providing law enforcement officers with secure and convenient access to storage services.

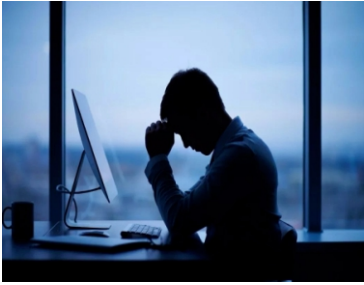

Business Challenges

Difficult Equipment Retrieval

1. Traditional methods of equipment issuance and return are limited by human factors and time constraints
2. They consume significant time and manpower and are prone to errors

Challenging Daily Management

1. The large and complex variety of equipment requires considerable effort for organization and placement
2. The workload of daily maintenance and inventory checks is huge

Difficult Tracking and Control

1. It is impossible to promptly know information such as which equipment has been lent out and the corresponding users
2. It is impossible to achieve effective behavioral control

Solution

Zhilai Intelligent Police Equipment Storage Locker helps achieve full-process, visualized management of police equipment. After passing identity verification through methods such as IC cards, fingerprints, or facial recognition, officers can access and return police equipment through a self-service process. The system features real-time recording, monitoring, multi-level management, emergency unlocking, report downloads, and abnormal alarm notifications to ensure the safe, orderly, and efficient management of police equipment.

Product Features

- Durable and sturdy materials
- Multiple identity verification methods
- Real-time tracking of equipment usage
- Access records create a management loop
- Exclusive RFID electronic tags
- 24/7 self-service access and return
- Real-time display of loan and in-use statuses
- Intelligent notifications for abnormal conditions

Product Specification

Starter Dimensions (L*D*H):	530*450*1880mm
Adder Dimensions (L*D*H):	900*500*1880mm
Adder Compartments:	6 doors
Compartment Dimensions (L*D*H):	395*500*503mm
Display Size:	21.5 inches
Material:	≥0.8mm high-quality galvanized steel plate

Application Scenarios

Police station

Security center

Bank

Cooperation Cases

Smart Gun and Bullet Locker – National Shooting and Archery Administrative Center
